

SIERRA LEONE AGRICULTURAL RESEARCH INSTITUTE (SLARI)

VACANCY ANNOUNCEMENT (RE-ADVERTISEMENT)

SLARI is an independent agricultural research and technology generating body established by an Act of the Sierra Leone Parliament, for the benefit of the farming, fishing and forestry sectors.

Its objectives include: development and selection of improved and high yielding production materials such as seeds, seedlings, livestock (including small ruminants and poultry); development of appropriate technologies for land preparation, planting, harvesting, processing, and storage of farm produce (i.e. technologies that are efficient and improve returns to labour); development of appropriate animal husbandry techniques; development of appropriate sustainable technologies for integrated natural resource and pest management that increase production potentials of crop and livestock systems without adversely affecting the environment; and the study and improvement of market systems.

Currently, SLARI has five research centres- the Njala Agricultural Research Centre which has a mandate to conduct research on roots and tubers(including cassava) and legumes(including groundnut); the Rokupr Agricultural Research Centre which has a mandate for research on cereals(including rice); the Kenema Forestry and Tree Crop Research Centre; the Teko Livestock Research Centre and the Magbosi Land and Water Research Centre.

The SLARI Council is inviting applications for the following senior level management positions:
